

Are your customers Cyber Essentials

certified?

By January 2023, **all end-user accounts** must have multi-factor authentication (MFA) enabled as a requirement of the **Cyber Essentials Certification**.

Secures applications no matter their location, with identity-based connectivity.

okta

Ensures users have the right access, to the right applications, at the right time.

Keeps users cyber compliant by applying the strongest form of MFA.

yubico

Now is the time to start exploring how your customers are keeping their users safe throughout the whole identity and access management journey.
