

IT PAYS TO BE SECURE

Echoworx Email Encryption

SECURING DIGITAL BUSINESS FOR WORLD CLASS ORGANIZATIONS

Echoworx's Email Encryption Platform is a high-performance 24x7 hosted email data encryption service – designed to help leaders enable innovative new business processes by making email data protection easier.

PRODUCT SUITE

Echoworx Email Encryption Platform

The boundary-based high-performance email data encryption service provides effortless secure delivery for confidential or sensitive inbound and outbound communications so you can meet the reality of what the business needs.

Echoworx Email Encryption: Volume Documents

Designed for intensive demands and mass distribution, this option enables organizations to send virtually unlimited amounts of encrypted documents and secure statements.

KEY DIFFERENTIATORS

Exclusively Focused on Protecting Email-Based Workflows

- Multiple standards-based encryption delivery: Web Portal, TLS (with fallback), Encrypted PDF, Encrypted Attachments Only (PDF, ZIP, Office XML), S/MIME and PGP making it easy to share secure email with diverse users, anywhere.
- Organizations get both transparent, one-click encryption for senders and self-service account management for recipients.– including options requiring no registration.
- Optimized mobile user experience. (iOS, Android)
- Quickly enable PGP encryption/decryption in the cloud with full key and certificate management.
- Easy set up; simple SMTP routing for fast access.

Authentication Options for Customizable Access Control

- Authentication set by policy, sender or recipient.
- Options include: Full OAuth access (Office 365, Gmail, Hotmail, Facebook, LinkedIn and Salesforce), Self-Registration, Shared Secret Passphrase, SSO, System Generated Verification Codes, Biometrics and Multi-Factor Authentication (MFA).
- Authentication provided out of the box includes self-registration, authentication through social connectors, passwordless authentication and authentication through your existing portal to our portal.

Customizable to Meet Your Specific Needs

- Echoworx provides a superior user experience that makes secure communication a natural part of your business processes
- Extensive branding is available in all delivery methods, with support for 27 language options – including a tailored interface, ensuring the experience is not affected by selection or customization.
- Multi-branding conditions are easily applied through policies at both the profile and template level for organizations operating under multiple banners or lines of business, including vanity domains.
- Customizable inline message warnings in both the header and footer for increased customer trust.
- Advanced branded pickup portal and online help centre.
- SMTP (DMARC) routing available for all outbound messages.

Detailed Audit and Tracking Capabilities

- Detailed reports provide statistics, troubleshooting and audit trail information including email opened, forwarded and recalled.
- Message receipts, message recalls and notifications without PowerShell or L2 Admins.
